INTRODUCTION

Welcome to Karratha Senior High School....a school that caters for the needs of all students. For those who are already associated with our school, you will appreciate what a great school we have and the exciting opportunities that are offered to all students. To those who are new arrivals, welcome, and I am confident you will soon realise what a great decision you have made in becoming part of the Karratha Senior High School community.

The information contained in this booklet introduces you to what subjects are offered to Year 10 students at our school in 2016, and gives information on other aspects of the school such as the services that are provided, programs that are in place and information on contributions and charges. Subjects that are offered at the school continue to be modified so that we better meet the needs of students. Clear pathways are created for students so that they can select subjects which allow them to develop the skills and knowledge to better prepare for courses in Senior School. While in Senior School, students will continue to develop what they need to know, understand and be able to do in preparation for training, employment or further study when they leave school.

We as a school are committed to developing a strong partnership with parents/caregivers because we believe that working together in the education of your child will result in achieving positive outcomes. Please take the time to read all the information in this booklet and I am confident you will get a real sense that we offer an education for your child that is supportive, comprehensive and challenging.

We look forward to working with you to provide an outstanding education for your child.

GREG KELLY
PRINCIPAL
CURRICULUM OVERVIEW

All Year 8, 9 & 10 students at Karratha Senior High School will study a full curriculum, with all subjects being selected from the following learning areas:

- English
- Mathematics
- Science
- Society & Environment
- Health & Physical Education
- Technology & Enterprise
- The Arts

Australian Curriculum

The Australian Curriculum will be implemented in full by 2016 across academic learning areas. In the Australian Curriculum, general capabilities are addressed through each learning area.

The general capabilities included in the Australian Curriculum are:
- Literacy
- Numeracy
- Information and Communication Technology
- Critical and creative thinking
- Personal and social competence
- Ethical behaviour
- Intercultural understanding

The general capabilities describe what students should know, understand, value and be able to do as a result of their curriculum experiences. Students achieve these outcomes at increasing levels of complexity as they progress through their schooling.

The Australian Curriculum for Health and Physical Education, Technology and Enterprise, and The Arts is still to be commissioned. These learning areas will continue curriculum delivery in 2016 based on outcomes provided by the School Curriculum and Standards Authority.
ASSESSMENT AND REPORTING

Student achievement will be assessed in each program of study. Assessment will be carried out continuously and will be a measure of your child’s progress towards attaining the outcomes of the subjects being studied. Typical assessment methods are written and objective tests, assignments, models and projects, experiments, open-ended tasks and portfolios.

Teacher judgements about your child’s performance are based on knowledge of your child’s work that is gained over time and in a range of situations. Each assessment contributes to a cumulative evaluation of performance.

The school will provide regular reports on your child’s achievement throughout the year. These will comprise;

✓ an Interim Report towards the end of term one;
✓ a mid-year report; and
✓ an end of year report.

Parents can also obtain special Progress Reports by contacting Student Services.

There are two parent evenings throughout the year where staff are available, by appointment, to specifically discuss individual student progress. Parents will be made aware of these dates for 2016.
The Student Wellbeing team meets the diverse needs of all students. The team promotes personal, academic and social excellence among students and staff and discourages those influences that can work against the attainment of these standards. The team provides holistic support to assist students in achieving their academic and personal potential.

The Student Wellbeing team includes the following staff/services:

- Student Services Deputy Principal
- Student Wellbeing Coordinators (Yrs 7, 8, 9 and Yrs 10, 11, 12)
- School Officer (Student Services Reception)
- School Nurse
- School Psychologist
- Chaplain
- Attendance Officer
- Aboriginal and Indigenous Education Officers

By working as a team, Student Wellbeing meets the needs of the whole child so their experience at school is happy, healthy and conducive to learning.

**Student Wellbeing Coordinators**

The Student Wellbeing Coordinators oversee matters relating to individual students and their welfare, carrying out a significant role in supporting the overall planning and organisation of student activities at the school. The Student Wellbeing Coordinators are an excellent point of reference in all matters relating to student performance and wellbeing.

**School Dress**

A School Dress Policy is endorsed by the School Council and completion of the Enrolment Form implies an acceptance of and adherence to the School Dress Code regarding uniform. This policy is in place for the safety of all students. Students in our school dress are readily identifiable in our community and we are proud of our dress code. All items of school dress code are readily available for purchase at the school.
SUBJECT DESCRIPTIONS
ENGLISH

The English Curriculum is built around the three interrelated strands of Language, Literature and Literacy. Together the strands focus on developing students' knowledge, understanding and skills in listening, reading, viewing, speaking, writing and creating. The English Curriculum builds on concepts, skills and processes developed in earlier years, and students will revisit and strengthen these as needed.

In Years 8 and 9 students will engage with a variety of texts for enjoyment. They will interpret, create, evaluate, discuss and perform a wide range of literary texts. They will also study texts designed to inform and persuade. As students progress the themes and issues involve higher order reasoning and intertextual references. Texts will include various types of media texts including newspapers, film and digital texts, as well as fiction, non-fiction, poetry and performances, procedures, reports, discussions, literary analyses, transformations of texts and reviews.

Texts studied develop complex themes and issues, the complexity of these increase as students progress from Year 8 to Year 9 to Year 10. Such texts explore themes of human experience and cultural significance, interpersonal relationships, and ethical and global dilemmas within real-world and fictional settings representing a variety of perspectives. Informative texts represent information about a wide range of specialised topics and text structures are more complex.

MATHEMATICS

Mathematics develops each student’s mathematical skill, understanding and reasoning.

KEY CONCEPTS

Number and Algebra: Number and Algebra are developed together, as each enriches the study of the other. Students explore the magnitude and properties of numbers and apply a range of strategies for computation and understand the connections between operations. Patterns are recognised and students develop an understanding of the concepts of variable and function. They build on their understanding of the number system to describe relationships and formulate generalisations. They recognise equivalence and solve equations and inequalities. They apply their number and algebra skills to conduct investigations, solve problems and communicate their reasoning.

Measurement and Geometry: Students develop an increasingly sophisticated understanding of size, shape, relative position and movement of two-dimensional figures in the plane and three-dimensional objects in space. They investigate properties and apply their understanding of them to define, compare and construct figures and objects. They learn to develop geometric arguments. They make meaningful measurements of quantities, choosing appropriate metric units of measurement. They build an understanding of the connections between units and calculate...
derived measures such as area, speed and density.

**Statistics and Probability:** Students recognise and analyse data and draw inferences. They represent, summarise and interpret data and undertake purposeful investigations involving the collection and interpretation of data. They assess likelihood and assign probabilities using experimental and theoretical approaches. They develop an increasingly sophisticated ability to critically evaluate chance and data concepts and make reasoned judgments and decisions, as well as building skills to critically evaluate statistical information and develop intuitions about data.

---

### Each student is required to have a scientific calculator (approximate cost $25)

---

### HUMANITIES AND SOCIAL SCIENCES

The Humanities and Social Sciences Learning Area covers study of **History, Geography, Economics** and **Careers**. The program has been structured to include both understanding and skills required for each unit, and have been mapped to prepare students to undertake Senior School courses thereafter.

**HISTORY**

History promotes the understanding of societies, events, movements and developments that have shaped humanity from earliest times. Through History students appreciate how the world and its people have changed, as well as the significant continuities that exist to the present day. History, as a discipline, has its own methods and procedures which make it different from other ways of understanding human experience.

The study of history is based on evidence derived from remains of the past. It is interpretative by nature, promotes debate and encourages thinking about human values, including present and future challenges. The process of historical inquiry develops transferable skills such as the ability to ask relevant questions; critically analyse and interpret sources; consider context; respect and explain different perspectives; develop and substantiate interpretations, and communicate effectively.

**GEOGRAPHY**

Geography integrates knowledge from the natural sciences, social sciences and humanities to build a holistic understanding of the world. Students learn to question why the world is the way it is, reflect on their relationships with and responsibilities for that world, and propose actions designed to shape a socially just and sustainable future.

Geography uses an inquiry approach to assist students to make meaning of their world. It teaches them to respond to questions in a geographically distinctive way, plan an inquiry; collect, evaluate, analyse and interpret information; and suggest responses to what they have learned. They conduct fieldwork, map and interpret data and spatial distributions, and use spatial technologies.
ECONOMICS and CAREERS
Economics and Careers develops the knowledge, understanding and skills that will inform students about the economy and encourage them to participate in and contribute to it. The curriculum examines the aspects that underpin decision-making at personal, local, national, regional and global levels. Students learn to appreciate the interdependence of decisions made, as well as the effects of these decisions on themselves, consumers, businesses, governments and other economies.

The Economics and Careers curriculum is informed by four organising ideas that help in developing students’ economics and business knowledge, understanding and skills; resource allocation and making choices; the business environment; consumer and financial literacy; and work and work futures. At the same time, students are exposed to and encouraged to develop enterprising behaviours and capabilities such as embracing change; seeking innovation; working with others; showing initiative, flexibility and leadership; using new technologies; planning and organising; managing risk; and using resources efficiently.

SCIENCE
Science provides an empirical way of answering interesting and important questions about the biological, physical and technological world. The knowledge it produces has proved to be a reliable basis for action in our personal, social and economic lives.

The Year 8, 9 and 10 Science course involves both practical and theory work based around Science Inquiry Skills, Science as a Human Endeavour and four key content areas.

Science Inquiry Skills: involves identifying and posing questions; planning, conducting and reflecting on investigations; processing, analysing and interpreting evidence; and communicating findings.

Science as a Human Endeavour: Through Science, humans seek to improve their understanding and explanations of the natural world. Science influences society by posing, and responding to, social and ethical questions, and scientific research is itself influenced by the needs and priorities of society.

Biological sciences: Science of the living world. Students will discover the science of living organisms.
- Cells, organs, systems and coordination within living organisms
- Ecosystems and interactions between living organisms and their environment

Chemical sciences: Science of matter. Students will discover the science of the matter which makes up our world.
- Atoms and atomic structure
- Elements, compounds and chemical reactions

Earth and space sciences: The science of Earth’s dynamic structure and its place in the cosmos. Students will discover the science of our planet and its place in the universe.
- Geology
- Our place in the universe

Physical sciences: The science of forces and motion, and matter and energy. Students will discover the science of the physical world
- Using models to explain forces in the physical world
- Energy transfers and conservation
HEALTH & PHYSICAL EDUCATION

Health and Physical Education offers students the opportunity to demonstrate and develop their knowledge and self-management skills which enable them to make informed decisions for a healthy and active lifestyle. Students develop their interpersonal skills to build and maintain effective relationships and further develop their movement skills to enable confident participation in physical activity now and as lifelong participants.

KEY CONCEPTS

Year 10 Physical Education
- Traditional sports-based learning or individual fitness-building aimed at recreation pursuits and lifelong participation in physical activity.

Year 10 Health Education
- Healthy Relationships, Keys 4 Life, Risk Taking and Harm Minimisation.

All students require a sports shirt in their house colour for all Physical Education classes.
ELECTIVE OPTIONS

Students in Year 10 have some choice in the subjects they study in Elective Learning Areas. Students must select THREE subjects. They must select:

- One subject from The Arts Learning Area
- One subject from The Technology and Enterprise Learning Area
- One subject from The Arts or Technology and Enterprise or Outdoor Education.

A completed elective form must be submitted and handed to the front office by Friday 14 August 2015. After this date a student’s choices cannot be guaranteed. Some elective subjects attract additional costs. Further information in regard to this is on page X.

Technology and Enterprise

Metalwork - $100.00
Metalwork course extends the students’ knowledge and ability in the areas of metal construction. Students are encouraged to develop their independent work habits, initiative and perseverance required to develop their own ideas and turn them into reality. In the second part of the year problem-solving and rational decision-making will be emphasised as the students develop their own design briefs.

Home Workshop - $100.00
Home Workshop encourages practical endeavours, logical thought, skills and projects. Students cover tasks such as welding, engine maintenance, tool and machine usage. In this course students will have the opportunity to develop a complex range of metalworking skills. This will include the processes of machining, arc, mig, and oxy-acetylene welding, precision operation of equipment and advanced hand techniques. Students will complete practical set test pieces on a regular basis while also designing and executing a major fabricated project. All students will become familiar with portable power tools and their safe and competent use.

Recycling - $35.00
Recycling follows the principles of sustainability: Reduce, Reuse, Recycle. Students will expand on the design process tackling more complex projects. They will also look into the impacts of waste and the importance of recycling in the community.

Woodwork - $100.00
In Woodwork students will plan and construct small furniture items for the home. They will learn to prepare and construct working designs. They will investigate ways in which different materials and processes can be used in the construction of their models and they will learn to manage tools, machinery and processes safely and efficiently. Integrated tasks will address OH&S standards, project management skills and new developments in the manufacturing industry. This course is highly practical-based. This course will enable students to develop woodworking skills, plan and construct a major project, and present quality designs of possible projects. At the end of the course the students will be able to demonstrate proficiency in all areas of wood work including, cabinet/furniture making, wood turning, basic building construction techniques and fine finishing. Projects could include coffee tables, cabinets, wood turned items, solid wood accessories, shelving etc.

Electronics - $60.00
Power to the people! Electronics rule our world. Without them many common items we use constantly throughout the day would not exist and our lives would be very different. Explore how electronics relate to both the electrical and telecommunications industries by building circuits and PCBs (printed circuit boards) while discovering what electricity is and how it works. Get involved
with programming electronics and discover the language used for programing. Research and explore the world of renewable and non-renewable energies, while comparing efficiencies cost of each and then the real cost to the planet if we don’t have a change of mindset on energy production very soon!

**Recreational Marine - $100.00**
Recreational Marine extends the knowledge students have in the area of marine study and fully prepares them to participate in recreational maritime pursuits. Activities include: Essential user, boat and outboard care; use, repair and maintenance of a cast net, ropes – splicing and whipping (the mystery revealed), reading local weather forecasts, charts, compass and GPS. Students learn how to read the tides and moon phases in order to calculate the best times for fishing. Students learn the importance of the focus on Fish for the Future.

**Childcare (incorporating Textiles) - $100.00**
Childcare will assist students wanting to gain employment in a child care centre or work with young children. The subject starts at preconception and continues through to the newborn and children under five years of age. This is an informative, hands on study of babies and young children.

**Food and Enterprise - $30.00**
Food and Enterprise is designed for teenagers who are into preparing a variety of recipes on a budget. Students will be given opportunities to choose or design low cost recipes, learn to budget, advertise and most of all, learn how to be enterprising. Students doing this subject will produce food to sell. If students have the drive, the energy and ambition to be a Food Entrepreneur, this is the subject for you.

**Food for Social Occasions - $100.00**
This subject allows students to explore a formal menu by preparing a range of delicious recipes. Take part in the Great Restaurant Challenge as you battle against the talents of your classmates, fighting it out to achieve top chef status. You will get to explore product development to create a new exciting food product. This is an elective which will be great for those of you who love learning about food locally and internationally and who would like to explore career options within the food and hospitality industry with a pathway to Food Science and Technology in Senior School.

**The Arts**

**Visual Arts - $30.00**
Visual Arts will further develop the fundamental drawing and designing skills. You will be given the opportunity to produce individual projects and learn about elements and principles of art through printmaking, painting, ceramics and sculpture. Written analysis and research tasks will help you to learn about exciting artists, past and present. This is a great chance to show your creativity and prove that you can produce an artwork!

**Fun with Art - $60.00**
How can your Art become applied and more fun? Students develop artworks primarily concerned with experiences of them self in reaction to given stimulus. The art focus is on developing personal identity and recognizing personal choices. The use of clearly defined processes will help you to overcome technical difficulties and ensure the process of making is an enjoyable one. This subject identifies how artists give personal direction to their work and how personality is the key to artistic difference. The subject looks at the fun of creation and the ability to think, plan and generate useful artistic results. You are encouraged to generate your own personal ideas rather than mimic those of others. This subject will assist you in:
- understanding appropriation
- developing awareness of aesthetics and how to control it
- investigating how artists generate ideas
- investigating their environment
- how they use their feelings to produce artistic response, and examining various art styles.
Music: The Music Industry - $35.00
Music students have the opportunity to learn all about the music industry. Students form their own bands and learn how to manage and promote their band, organise performances and select repertoire. They are taught how to write their own songs and to critically reflect on musical performances. They have the opportunity to develop their skills on their chosen instrument through both practical experience and a theoretical approach to music notation and harmony.

Drama - $30.00
Drama involves students making and responding to drama independently and in small groups, and with their teachers and communities. They explore drama as an art form through improvisation, rehearsal and performance. Students manipulate combinations of the elements of drama to develop and convey the physical and psychological aspects of roles and characters consistent with intentions in dramatic forms and performance styles. Students analyse a range of drama from contemporary and past times to explore differing viewpoints and enrich their drama making, starting with drama from Australia and including drama of Aboriginal and Torres Strait Islander Peoples, and consider drama in international contexts. Students structure drama to engage an audience through manipulation of dramatic action, forms and performance styles and by using design elements. Students perform devised and scripted drama making deliberate artistic choices and shaping design elements to unify dramatic meaning for an audience. Students evaluate how the elements of drama, forms and performance styles in devised and scripted drama convey meaning and aesthetic effect.

Media - $35.00
Year 10 Media Madness
Media is a busy yet creative subject that accommodates those students who are enthusiastic about group work. In this course, students develop skills so that they understand various forms of media ranging from film, photography, print media, radio and television to the new emerging multimedia technologies. Students learn how to consider people, events and issues that are represented in the various media communications. Students create, produce and present their own works in Media Madness to illustrate their ideas using the various technologies and practices. If the student can think outside the square and enjoy endless opportunities of the evolving media world, then this is the subject to choose.

Health and Physical Activity
Outdoor Education - $85.00
This is an elective for students who want to challenge themselves, develop valuable leadership skills and enjoy the Pilbara outdoors. Students will be given a fun introduction into the world of Outdoor Education.

Focus:
- Adventure games – to develop initiative, self-esteem and leadership skills.
- Environmental awareness – developing minimum impact practices.
- Planning and preparation – for an overnight expedition.
- Risk management – safety and first aid skills.
- Campcraft skills – cooking, equipment selection and set up.
- Outdoor activity skills – may include mountain biking, hiking, snorkelling and kayaking.

Students must be willing to get involved in all activities and participate in an overnight expedition.
CONTRIBUTIONS AND CHARGES IN SCHOOLS: A GUIDE FOR PARENTS

CONTRIBUTIONS

The school can request a contribution of up to $60 per student per year in Years K-6 and up to $235 per student per year in Years 7 to 10. This contribution is towards the cost of providing an educational program that meets the requirements of the curriculum framework. The contributions collected from parents are used towards providing materials, services and facilities directly used or consumed by students, including hire of textbooks or the provision of text material. The School Council approves the level of contributions. The costs are detailed on the school contributions and charges list. This contribution is voluntary. It is expected that those who can afford to will make the contribution. Schools offer a range of payment options to assist parents. Please discuss this with the business manager. For parents of secondary students who have a Family Health Care Card the contribution can be reduced by applying through the Secondary Assistance Scheme. This scheme provides payment towards the parent contribution as well as a clothing allowance. Application forms are available at the school.

CHARGES

Charges apply to high cost options (called extra cost options) in Years K to 10 that are alternative to parts of the program covered by the contribution. Students can opt to select these. Extra cost options are also specific activities, services or facilities that schools offer for students to use or take part in. Excursions such as camps, the school yearbook and school social activities are examples. Students opt to take part in these activities or use the services or facilities. The charge associated with the provision of these activities, services or facilities must be paid. The charge covers the cost of providing the service or running the activity. The School Council approves the level of charges. The costs are detailed on the school contributions and charges list. All Senior School courses or programs are treated as extra cost options; charges apply and must be paid. Schools offer a range of payment options to assist parents. Please discuss this with the business manager. For parents of secondary students who have a Family Health Care Card the Senior School charges can be reduced by applying through the Secondary Assistance Scheme. This scheme provides payment towards the course charges as well as a clothing allowance. Application forms are available at the school.

OTHER COSTS

Personal items
These are personal items that students need to own. The list is detailed and provided to parents with the school contributions and charges list. These can be purchased from any supplier. The School Council approves this list.

Other services
These are services or facilities which students might choose to use. Schools make provision for these on a cost-recovery basis. Examples include the provision of photocopying facilities and printing facilities for computer-generated assignments and Internet downloads over and above that provided as part of course allocations.

PARENT contributions go towards the cost of certain materials, services and facilities directly used or consumed by students. These contributions assist schools in the provision of textbooks or text material. Where students elect to participate in extra cost optional components (including post-compulsory), compulsory charges will apply. PARENTS ARE ALSO RESPONSIBLE FOR THE PROVISION OF A STUDENT’S PERSONAL ITEMS. Where students wish to make use of other optional items, they must purchase them themselves.
Summary

The Government provides a comprehensive education that satisfies the requirements of what is determined through the School Curriculum and Standards Authority for all students throughout Western Australia. Government funding is provided to schools for the operating costs associated with the education of students. The costs include: salaries of teaching and administrative staff, school buildings and facilities and certain materials. This provision accounts for a significant part of the total state budget. Some school communities also supplement the funds available to them through local fundraising.

Parents are also reminded that there are additional approved charges which are for the school diary, handbook, P & C contributions, Year Book, printing and library fees.

Families may qualify for financial assistance to help with the costs of schooling. If parents have a Health Benefits & Concession card, Health Care card or Health Benefits card valid from the first day of the school year, they can collect a form from the front office and show their current card. This should be carried out at the commencement of the school year.

The allowances are:

- Secondary Assistance Scheme – an allowance of $235 to be taken off contributions and charges
- Secondary Assistance Scheme (Clothing) – an allowance of $115 which is sent to the parent for uniforms.

Abstudy for Aboriginal & Torres Strait Islander students (application through Centrelink – see the Student Service Manager).

As required by the Department of Education, a maximum voluntary contribution of $235 can be requested by schools from parents for a student selecting a program of study (three choices of options, at least one each from The Arts and T&E).
Extra Cost Options – payment of deposit ‘up front’
It is a requirement of the Department of Education that students are able to select a study program within the maximum voluntary contribution of $235.00. Should students wish to study other subjects that may be classified as “extra cost options”, a further charge is applicable. This charge generally covers the cost of consumable items.

In order to gauge if there is an appropriate number of students selecting “extra cost options” for the subjects to be placed on the school timetable for 2015, the school requests that parents pay a deposit of $100 for such subjects when completing the Subject Selection Sheet.

Possible additional costs not currently included
Throughout the year, your child may be interested in participating in additional activities that become available but have not been planned for. Whilst is it not compulsory for students to attend such activities, should these be available, the costs listed below may provide some guide as to the costs associated with such activities.

### EXTRA COST OPTIONAL COMPONENTS OF EDUCATIONAL PROGRAMS

**CONDITIONS OF ENROLMENT**

1. Although the school makes every effort to accommodate each student’s preferred program, organisational and resourcing issues may result in students having to re-select a subject. You will be informed should this eventuate.

2. At Karratha Senior High School we make every attempt to assist parents in making the most appropriate selections to qualify your child for future study or desired career choices and that these subjects are within the students’ capabilities.

3. For those students going into Year 10 in 2016, complete the GREEN Year 10 Subject Selection Sheet and submit it to the front office by Friday 14 August 2015 with the required deposit for the high cost electives.

4. Those students who do not submit the form will most likely be allocated the listed low cost options.
Sample 1 SUBJECT SELECTION SHEET

STUDENT NAME: Justin Bibby

Students MUST select three subject, in the following combination:
• One subject from The Arts Learning Area
• One subject from The Technology and Enterprise Learning Area
• One subject from The Arts or Technology and Enterprise.

A RESERVE MUST BE SELECTED FOR EACH CHOICE. Please be aware of extra course option charges.

THE ARTS:
Select one subject (and Reserve) from The Arts.

WHO CAN HELP YOU

Teachers are able to provide valuable advice and guidance to assist students to make decisions about Year 9 - 10 subjects.

If you have any general queries about the Subject Selection process, please feel free to contact the school. The most appropriate person to talk to would be either the Student Wellbeing Coordinator, or a Deputy Principal.

For specific subject related queries, please contact the relevant Head of Learning Area or Teacher in Charge.

The contact names of all relevant staff are included below.
